CHEMICAL FEED & DISINFECTION GROUP

PACKAGED SOLUTIONS

TOTAL COMMITMENT TO OUR
CUSTOMER'S NEEDS

"Our goal is to become the premier chemical feed system providers."

Today, more than ever, you need a business partner that is reliable, responsive and technically adept. USFilter Chemical Feed and Disinfection Group rises to this challenge every day. Our vision is to become the worldwide leader in the manufacture, sales and service of chemical feed and disinfection systems.

USFilter's Chemical Feed & Disinfection Group is comprised of Stranco Products, Wallace & Tiernan Products, Electrochemical and Electrode Products business centers. Together, these resources represent a wealth of talent and capabilities that will enable our vision to become a reality.

The professionals that make up the ChemFeed team include regional sales managers, project managers, application engineers, fabrication and quality control specialists, and support personnel, who all strive to exceed customer expectations.

This allocation of resources, coupled with our commitment to provide competitive pricing and exceptional after-the-sale support, clearly demonstrates our desire to become the premier chemical feed system provider.

Service programs are a key element to our overall success. The ChemFeed Group regional sales managers regularly perform chemical feed audits in our customer's facilities. Submitted written reports outline preventative maintenance, system improvements, and new equipment recommendations designed to enhance performance and bottom line results.

Automatic Switchover

LIVELLO Wireless Level Monitoring

Premia Metering Pump

Distributed Products

An extensive inventory of chemical feed and control products, coupled with readily accessible technical experts, is a winning combination for end users and water treatment professionals alike.

EZ-1

W&T Encore Pump

EZ-Box

PolyBlend M-Lo Series

PolyBlend M-Series

PolyBlend DP Series

Polymer Dosing

The PolyBlend® polymer feed system's innovative design and superior results make it an industry benchmark for liquid and dry polymer activation systems.

Chemical Feed & Disinfection Group Packaged Solutions

Controls

The Stranrol® name is synonymous with precision control. Additionally, we regularly integrate PLC, HMI, relay logic, and micro-controllers into our chemical feed designs.

Allen-Bradley PanelView™

Stranrol Controllers

Custom Control Panel

Allen-Bradley SLC500™ Controller

Fertigation Control System

XP Cooling Water Control System

Engineered Systems

A talented staff of engineering, procurement, fabrication, and project management professionals design, build, and deliver quality custom chemical feed and control systems.

Acid Feed System

High Pressure Boiler Feed System

Chiller Control System

USFilter has unrivaled expertise in virtually all areas of chemical feed and control. Integrated solutions are provided for a vast array of applications and situations. This diagram illustrates how the ChemFeed Group coordinates with you and your organization.

GETTING STARTED -

Access to all of USFilter's resources begins with a single phone call to one of our regional sales managers. They have the latitude to mobilize whatever resources are necessary to respond to your requests. Throughout the process, they serve as a single point of contact.

SCOPE DEFINITION -

System performance, budgeting, and delivery requirements are established. Preliminary recommendations and ideas are developed and checked against general technical, economic and delivery requirements.

SHIPPING -

Preparation for transport typically involves foaming, crating, and wrapping the finished product.

PLANT VISIT -

The complexities of many jobs require an on-site visit to gain a full understanding of the opportunity and potential solutions. Industry and application specialists are available as needed.

QUALITY CONTROL -

Each finished system is operated for at least 24 hours. Checklists for electrical, mechanical, documentation, plumbing and control assist our inspectors in identifying and correcting potential problems.

**Working With
USFilter Stranco
Products**

**APPLICATION ENGINEER
ASSIGNED -**

Once the scope is clearly defined, an application engineer is assigned to the project. The A.E. works closely with the regional sales manager to provide a rapid, thorough response.

FABRICATION-

Manufacturing begins when the completed job file moves into the production queue. Plumbing, welding, electrical and controls specialists are then assigned.

QUOTATION -

The application engineer develops a quotation including a functional description, bill of materials, and general layout drawings.

FINAL ENGINEERING REVIEW -

Before the project goes to production, a final engineering review is conducted to make sure that all codes and industry safety standards are met and the system is technically sound.

PROJECT MANAGER -

Once the quotation is accepted and becomes an order, a project manager is assigned to oversee the entire process from order entry to shipping. This assures that procurement, fabrication, and quality control steps are managed in concert with the delivery requirements.
