

PACKAGED CHEMICAL FEED SYSTEMS

Stanco's skid mounted chemical feed packages offer stand alone make down and metering of a wide variety of chemicals from bulk bags/ton packs to tote vessel delivery systems.

Make down and feed systems are available for hydrated lime, soda ash, ferric sulphate and a variety of other chemicals delivered in bulk containers.

Systems are custom designed to store dry chemical, feed, make down/mix, and meter to process.

You will find the Stanco package to be accurate and reliable, delivering repeatable results with minimal maintenance.
